📇 PROFILE

Passionate about React.js development, I thoroughly enjoy coding and crafting solutions that elevate user experiences. I've mastered i18next, Redux Toolkit, and integrated diverse libraries to enhance web app functionality and user interfaces.

🎨 SKILLS

HTML/CSS

JavaScript
ES6

React JS
Javascript Library

Mui, I18next, Gsap, Jodit-react etc.
React Libraries

Strapi
Headless CMS

Git/GitHub/GitLab
Gitlens/GitHub Desktop

Reducx Toolkit
State Managment Tool

For Api Integration
Rtk Query / Axios / Fetch

Postman
API Testing Tool

📂 PROJECTS

DzFood ⧉
I developed the front end of this food website using React.js
Technologies:
- React.js
- Redux Toolkit / RTK Query
- I18next

Notable features I implemented in this project include:
- Robust filtering and pagination options
- Seamless add-to-cart and wishlist functionality
- Internationalization powered by the I18next library."

Mini React Projects
📰 News App ⧉ | ☀️ Weather App ⧉ | ✍️ Rich Text Editor ⧉ | 📅 Mini Scheduler Calendar ⧉
- **News App:** ⧉ This project was developed to enhance my API calling skills. Within this project, I retrieve news articles either by country or by category, utilizing the "https://newsapi.org/" website as the data source.
- **Weather App:** ⧉ I created this website as an opportunity to further solidify my API retrieval knowledge. Within this project, users can search for weather information for any city or country, expanding my proficiency in handling API data.
- **Text Editor**: ⧉ I designed and implemented a custom text editor, incorporating a wide range of features and functionalities to enhance the user experience.
- **Scheduler Calendar:** ⧉ I also crafted a calendar component inspired by the "@aldabil/react-scheduler" library. Preferring not to rely on external libraries, I created this calendar from scratch and continually improved its capabilities during my spare time.

Blogging website
02/2023 – 04/2023
Created a blog website using React.js, Strapi, and Material UI for an intuitive and enjoyable content creation and sharing experience.

Authentication, Google | Facebook

I do authorize users through Google or Facebook. I am using Firebase for the Google Authorization process. For authorizing users by Facebook, I use the react-facebook-login library

💼 PROFESSIONAL EXPERIENCE

Front End Developer, Danzee Tech ⧉
01/2023 – present | Rahim Yar Khan, Pakistan
I had a rewarding experience at Danzee Tech with an excellent team, stimulating projects, and significant personal growth:
- Made substantial contributions to the "DZ Food" front-end.
- Mastered React tools, especially Redux Toolkit.
- Acquired advanced skills in graph libraries, calendar systems, and text editors.

🎓 EDUCATION

ICS, TCI Collage RYK
05/2023 – present | Rahim Yar Khan, Pakistan
